

## TCCO-DOCX, PDF reports in UNIFACE

PDF is 100% cloud. PDF (Portable Document Format) invented by Adobe Systems is now an open standard for electronic document exchange maintained by the International Organization for Standardization (ISO). PDF documents are widely supported. You can view PDF's virtually on any platform, including Windows, Mac OS, and mobile platforms including Android and IOS for iPhone and iPad.

TCCO-DOCX is TCCO's solution for implementing PDF documents in UNIFACE. TCCO-DOCX uses open standards and open source for the transformation of UNIFACE reports into PDF documents. TCCO-DOCX has the following characteristics:

- ✓ TCCO-DOCX fits in a paperless office saving documents in PDF format. Exchanging documents by using mail.
- ✓ TCCO-DOCX implements PDF documents in UNIFACE using widely accepted open standards (XML, XSL:FO, XSLT and Java).
- ✓ TCCO-DOCX transformation engine is developed using open source (XSLT-, FOP-processor).

## TCCO-DOCX implementation

The TCCO-DOCX implementation is separated into two areas:

- ✓ The TCCO-DOCX UNIFACE template is responsible for generating the appropriate XML stream.
- ✓ The TCCO-DOCX transformation engine takes care of transforming XML streams into PDF documents.

## TCCO-DOCX benefits

- ✓ Easy to maintain. TCCO-DOCX letters and reports are easy to maintain with a little bit of XHTML knowledge.
- ✓ TCCO-DOCX can implement your PDF publications according to your corporate identity.
- ✓ TCCO-DOCX has been proven in small/medium enterprises and large companies as a stable report generator.

## TCCO integration services

TCCO can integrate TCCO-DOCX in an UNIFACE email service.

TCCO can implement your corporate identity in TCCO-DOCX.

TCCO offers Training, Coaching and Consultancy integrating UNIFACE with the World Wide Web.
