

TCCO

TCCO has a [long track record](#) in successful migrating, modernizing, developing and maintaining business critical UNIFACE applications. With more than 20 years of UNIFACE development experience we can say that [UNIFACE has become a part of our DNA](#).

But there is more...

TCCO is a [creative out of the box](#) thinker, creator, and [innovator](#) with a long track record in [integrating innovative products in UNIFACE](#).

TCCO was involved in the development of Compuware's Building Blocks 7.2.04/06 and did not stop with evolving until the current TCCO-FAST version based upon UNIFACE9.6 technology.

TCCO-FAST integrates:

- ✓ TCCO-FIND Search Engine Integration based upon [Solr Lucene™](#)
- ✓ TCCO-DOCX [PDF document generator](#) based upon the open standard XSLT, XSL:FO and open source (XSLT- and FOP-processor).
- ✓ [Authentication and authorization](#) based upon KERBEROS and open SSL.
- ✓ UNIFACE templates to [speed up the development process](#).

Web technology

As an early adaptor TCCO has also a long track record in using web technology. We have followed the recommendation of the World Wide Web Consortium since 1997. Starting with HTML3.2, HTML4, XHTML until the current version: HTML5. With the introduction of XSLT (a transformation language) we generate our websites from XML content. The current version of this generator [transforms WORD and open Office documents into a good looking fast and responsive websites](#) using state of the art technology such as HTML5, CSS3, Bootstrap JQuery, JSON and Javascript.

TCCO offers Training, Coaching and Consultancy and offers a helping hand with your migrations, modernization and development of your business critical applications.
